

Activity #4: STIR UP SOMETHING EVIL!

Follow the instructions below to create your very own **GREEN SLIME**. It would make even the Great and Powerful Mark proud.

What You Need

- School glue
- Borax
- Green food coloring (optional)
- Water
- Two bowls

What You Do

1. In one bowl mix 1 oz. glue (about $\frac{1}{4}$ of a small glue bottle) and $\frac{1}{4}$ cup water. If you want GREEN slime, add food coloring to the glue-and-water mixture.
2. Add $\frac{1}{4}$ cup of borax to the glue-and-water mixture and stir slowly.
3. The slime will begin to form immediately. Mwhaaa-haa-ha!
4. Stir as much as you can, then dig in and knead it with your hands until it gets less sticky. This is the messy part, but it allows everything to come together so dig in and don't be shy! (Don't worry about any leftover water in the bowl; just pour it out.)
5. SHOW IT OFF!*

*When you're not terrorizing non-evil scientists with your awesome slime, store it in a plastic bag in the fridge to keep it fresh.
